

January 27, 1950

Mr. Sheldon Olds, President
Old Field Canal Company
Cedar City, Utah

Dear Sir:

RE: COAL CREEK DISTRIBUTION

This acknowledges receipt as of January 26, of your letter undated, relative to head gates and measuring devices which have heretofore been required by this office to be installed before the 1950 irrigation season.

From the description given in your letter it is difficult to judge the adequacy of the devices and structures. You are, therefore, required to submit definite plans for them, which plans should be prepared by a competent engineer.

You are urged to submit the plans without delay in order that they may be approved for the proposed construction.

Yours very truly,

Harold A. Linke
STATE ENGINEER
